OUTDOOR APPAREL FACTORY

FISHING APPAREL

OEM & ODM COLLECTION 2026

Waterproof shells · lightweight anoraks
UV hoodies · bib pants

Built for changing water, wind and sun.

PRIVATE LABEL / DEVELOPMENT READY

01

02 / COLLECTION LOGIC

One collection for changing water, wind and sun.

Fishing apparel must protect without restricting the cast, the boat movement, or long hours in changing conditions.

RAIN Taped seams, adjustable hoods and protected openings

WIND Secure cuffs, hems and clean front constructions

SUN Lightweight coverage with qualified UV-protection fabrics

MOTION Pattern shaping that supports casting and active use

A complete fishing program, not a single jacket.

WEATHERPROOF SHELLS

3L and 2.5L options

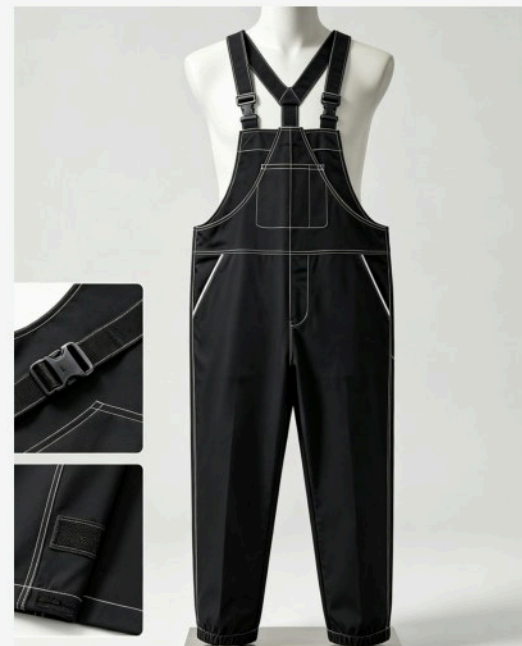

LIGHTWEIGHT ANORAKS

Clean half-zip silhouettes

SUN HOODIES

Coverage and quick-dry comfort

BIB PANTS

Paired all-weather protection

Reference styles shown. Fabrics, colors, trims, branding and specifications are developed per project.

3-layer shells anchor wet-weather programs.

REFERENCE CONFIGURATION

10,000 mm+

waterproofness target

8,000 g/m²/24h+

breathability target

- 100% polyester 3L reference fabric
- Fully taped seam construction
- Adjustable hood, cuffs and hem

Performance values reflect the supplied reference style; final results depend on selected fabric, seam tape and construction.

Lighter shells protect without weighing down the cast.

LIGHTWEIGHT 2.5L OPTION

Packable protection for changing conditions.

- Low-bulk 2.5L shell construction
- Seam-sealed rain protection
- Adjustable cuffs and hem
- Solid, contrast-panel or print programs; optional light UV resistance

Best suited to transitional weather, boat use and markets that need a lighter hand feel.

LIGHTWEIGHT PULLOVER RANGE

Half-zip anoraks keep the front clean and practical.

LIGHT GRAY

Color / panels / print customizable

NAVY

Color / panels / print customizable

ICE BLUE

Color / panels / print customizable

OCEAN CAMO

Color / panels / print customizable

Pullover silhouettes can be developed with side zips, chest storage, ventilation and packable constructions.

Sun hoodies extend the line beyond rainwear.

DESIGN OPTIONS

UPF 50+ target

subject to selected fabric testing

- Integrated hood and face-cover options
- Quick-dry stretch knit packages
- Thumbholes or clean cuff finishes
- Solid and camouflage print programs

UV rating, moisture management and colorfastness should be confirmed during material approval.

Waterproof bibs complete the all-weather set.

PAIR WITH SHELL PROGRAMS

Coverage designed for wet decks, shorelines and long sessions.

- Reinforced waterproof polyester options
- Adjustable suspenders and chest storage
- Reinforced knee and seat zones
- Adjustable leg openings
- Contrast stitching and branding options

Reference silhouette shown. Waist, rise, knee articulation, reinforcements and pocket layout can be re-engineered.

FUNCTIONAL CONSTRUCTION

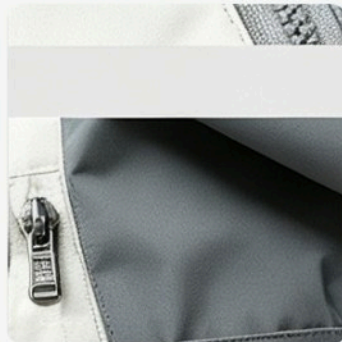

Small details decide comfort on the water.

PROTECTED ZIP

Pocket and front-opening options

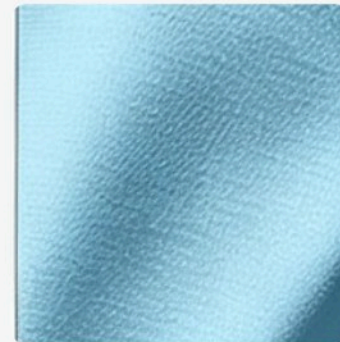

CUSTOMIZABLE

POCKET / CUFF

Zip access and hook-and-loop finish

CUSTOMIZABLE

FABRIC HAND

Lightweight woven shell packages

CUSTOMIZABLE

HEM & SLEEVE

Secure openings in wind and spray

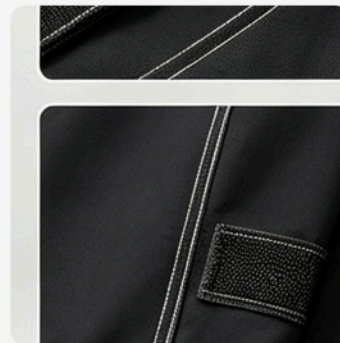

CUSTOMIZABLE

ADJUSTABLE HARDWARE

Suspenders and easy-fit systems

CUSTOMIZABLE

REINFORCEMENT

High-wear zones and secure hems

CUSTOMIZABLE

Final component selection follows the target price, use environment and required test standard.

Match performance and price with the right construction.

2L

VALUE / VERSATILITY

Outer fabric + membrane, typically paired with lining. Flexible for entry and mid-level rainwear.

2.5L

LIGHT / PACKABLE

Printed or textured inner protection reduces bulk. Suited to lighter shells and anoraks.

3L

TECHNICAL / DURABLE

Face, membrane and backer bonded together. Suited to higher-performance shell programs.

Also configurable: stretch • recycled content • C0 DWR • mechanical finish • print • color matching

Built for private-label development, not fixed stock.

01

PRODUCT

- Pattern and fit
- Pocket architecture
- Hood, cuff and hem systems

02

MATERIAL

- Shell and membrane
- Lining or 2.5L / 3L
- DWR, stretch and UV targets

03

BRAND

- Logo and label package
- Custom colors and prints
- Size set and packaging

Start with your tech pack, reference sample or target market.

We align construction, materials and costing before sampling.

Minimum order and development route depend on style complexity, fabric availability and annual volume.

MANUFACTURING CAPACITY

Factory scale supports repeatable outdoor programs.

20,000 m²

FACTORY AREA

300+

EMPLOYEES

7

PRODUCTION LINES

30,000+

OUTDOOR JACKETS / MONTH

40–50

SEAM-TAPING MACHINES

15

QC TEAM

Additional equipment includes template machines, infrared cutting and automatic spreading systems.

Quality gates protect waterproof performance.

01	MATERIAL INTAKE	Shade, hand feel, colorfastness and physical test review
02	FIRST PIECE	Construction, measurement and process approval before bulk
03	IN-LINE	Seam quality, seam tape, critical dimensions and workmanship
04	FINAL	Appearance, measurement, function, packing and shipment release

TESTING SCOPE

Evidence before shipment.

- Hydrostatic pressure
- Breathability
- Color and colorfastness
- Tear and fabric strength
- Light exposure
- Seam-tape adhesion and appearance

Test requirements and acceptance levels are confirmed with the buyer during development.

Start with the style, fabric and volume.

For a useful first review, send:

- Reference style or tech pack
- Target quantity and size range
- Fabric / performance target
- Logo, color and delivery market
